

SAP Labs

Profile: Associate developer

Expected GPA requirement: CGPA 7+

The process involved: One Online Test with both technical & aptitude based questions.
Four Personal Interviews - two technical, one management & one HR

Questions in interviews: Object-Oriented Programming language (OOPS), Data Structures, Algorithms & Basic Aptitude.

Preparation: Prepare for Object-Oriented Programming language (OOPS), Data Structures & Algorithms based questions, practice competitive coding in hacker rank & practice basic aptitude-based questions. Go through company-specific questions, Data Structures, Algorithms & interview questions from Geeks for geeks.

Typical day: Facing new problems/challenges daily, fixing bugs, understanding legacy code, developing new features.

Expectation vs Reality:

Was not aware of office culture, so did not have any expectations.

Work culture, benefits and perks of working at your firm:

Work culture is good, and everyone is treated equally. People encourage you to learn and try new things.

I can't talk about benefits as it's just been a year, and I never got to work directly in the office due to the ongoing pandemic.

Perks are above average.

T G PREETHI RAKSHA, batch of 2020 EEE
