

Jindal Stainless Steel

Profile: GET, New Business Development for Jindal Stainless Limited.

Diversifying from their parent business of Stainless steel, the company is venturing into the Composite Materials (Advanced materials) Industry.

Eligible Departments: Mech, MME

Expected GPA requirement: 7.5+ (General core company cutoff)

The process involved :

A two-step process:

1. **Online test (aptitude and core):** The core questions were based on metallurgy, not on advanced materials (**Example:** Primary role of Chromium in Stainless steel). The test had 20 core and 20 aptitude based questions.
2. **Interview:** Questions were mainly to check whether we were suitable for the post.

Job Details:

A day starts with a Team Meeting discussing the previous day's progress and ways to rectify the shortcomings, followed by a discussion on the various opportunities to collaborate with other manufacturing companies. The role I was offered was not related to steel but related to composite materials; proper training was given once I joined the company.

Once assigned a project, you have complete freedom with your work.

The work culture depends upon the team you are working in. Free meals, two days off per week are some benefits.
